Testimonials

"Since I became interested in photography, it has been on my bucket list to photograph the night sky, especially the Milky Way. Through one of Mike Pach's night sky workshops, I was able to mark this off of my list. I was extremely pleased with the way he ran the workshop. My photos from that night are amazing and beautiful thanks to the help I got from Mike. Thank you for helping me cross this amazing opportunity off of my bucket list." ~ Liz Montoya

Milky Way photo by workshop student and intern Liz Montoya

"I've been a pro photographer for a few decades. One area where I perhaps needed the most help was in my night photography. I've done some on my own, but it was mostly guesswork. I joined Mike Pach of 3 Peaks for an overnight photo workshop on the topic and came away with an incredible amount of useful info! I can honestly say that the knowledge I gained from the experience will inform every night photography session I ever do." ~ Todd Caudle

"I've taken workshops with Mike as well as photo and Photoshop classes. Without exception, I have always come away learning new photo tips that I can put to immediate use. Mike takes the time to make sure you are learning and is very patient with questions. Mike wants to make sure you learn while also getting great photos. I've done classes with other folks, both workshops and classroom. Hands down, Mike is the one I keep going back to." ~ Tracy D.

"Mike was very well organized and prepared to host a great workshop event. It made for a wonderful opportunity to learn with a combination of classroom training, in-field training, and plenty of individual attention. And with stunning locations that were hand-selected & scouted in advance, our opportunity for great nightscape images was fantastic! And there's no doubt ... the area around Westcliffe is excellent for night photography. Keep up the great work!" ~Mike Berenson
